

Flatness tolerance: +/-1cm
Any tolerance not respected will result in excess concrete consumption, which will be invoiced to your project.
The platforms will be approved to the following parameters:
EV2>50 MPa EV2/EV1<2
The customer needs to deliver platforms that comply with the new decrees published in the Journal Officiel in June 2021, with the permeability of the soil under the tanks reduced to 10⁻⁷ m/s.

**LEVELS TO BE CHECKED
BY THE CUSTOMER**

**Minimum tank excavation
internal diameter +2.00 m.**
